

Memo for Record

December 7, 2009

Marge Brown FX-6 Personal Privacy left a message last week because she was concerned that TASC was not going to be available for SSFL.

She wanted to know who was opposing it and why.

She was confused as to EPA's role in TASC and thought that if TASC was made available that Greg Dempsey and other EPA staff would no longer be involved. I assured her that our processes are separate and that all EPA staff are still engaged.

She noted that a CAG might be formed, although she said that she wouldn't be involved with it.
